Children Cry For

Special Care of Baby. That Baby should have a bed of its own all are agreed. Yet it is more reasonable for an infant to sleep with grown-ups than to use

a man's medicine in an attempt to regulate the delicate organism of that same infant. Either practice is to be shunned. Neither would be tolerated by specialists in children's diseases. Your Physician will tell you that Baby's medicine must be pre-

pared with even greater care than Baby's food. A Baby's stemach when in good health is too often disarranged by improper food. Could you for a moment, then, think of giving to your ailing child anything but a medicine especially prepared for In-

fants and Children? Don't be deceived. Make a mental note of this: - It is important, Mothers, that you should remember that to function well, the digestive organs of your Baby must receive special care. No Baby is so abnormal that tidesired results may be had from the use of medicines primarily prepared for grown-ups. /
